

Kaplan ESSENTIAL SKILLS

Target skills for measurable results

Kaplan Essential Skills programs teach students the fundamental skills they need to succeed in the classroom, on standardized assessments, and beyond.

Grade level(s): 2 and up
Subject(s): English Language Arts, Mathematics
Program length: Flexible, up to 10 hours per title

PROGRAM COMPONENT

VALUE

Targeted programs that address student needs in ELA and mathematics	Educators can select programs for elementary students who need support in capitalization and punctuation, reading comprehension, and number sense; they can also select programs for secondary students who need help with grammar, essay, or inference skills.
Scaffolded lessons with step-by-step instructions	Lessons begin with direct instruction, move to guided practice, and end with independent practice to ensure that students grasp the skill taught in each lesson.
Teacher's editions with notes to guide students through each lesson	Teachers can use the detailed recommendations in each lesson to tailor instruction for their classrooms.
Formative assessments	Each lesson includes independent activities and practice so teachers can analyze student acquisition of each skill.
