

TABLE OF CONTENTS

Book 1 – Understanding Numbers

On-Ramp Assessment 1-1

Lesson A: Representing Numbers 1-7
How can you represent numbers in different ways?

Lesson B: Place Value 1-17
How does the place of a digit in a number determine its value?

Lesson C: Comparing Numbers 1-27
How can you use place value to compare whole numbers?

Lesson D: Expanded Form 1-37
How is expanded form related to place value?

Lesson E: Reading and Writing Whole Numbers 1-47
How does place value help you read and write whole numbers?

Lesson F: Large Numbers 1-57
How can place value help you read and write numbers in the millions?

Lesson G: Rounding 1-67
How does place value help you round a number?

Lesson H: Writing Decimals 1-77
How are decimals related to place value?

Lesson I: Understanding Halves and Fourths 1-87
How do you represent parts of a whole as fractions and decimals?

Lesson J: Comparing Decimals 1-97
How can you use place value to compare decimals?

Off-Ramp Assessment 1-107

Book 2 – Addition and Subtraction

On-Ramp Assessment 2-1

Lesson A: Addition 2-7
What does addition represent?

Lesson B: Subtraction 2-17
What does subtraction represent?

Lesson C: Related Addition and Subtraction Facts 2-27
What strategies can you use to remember addition and subtraction facts?

Lesson D: Addition, Subtraction, and Place Value 2-37
How can place value help you add and subtract multidigit numbers?

Lesson E: Mental Addition 2-47
What strategies can you use to add in your head?

Lesson F: Mental Subtraction 2-57
What strategies can you use to subtract in your head?

Lesson G: Addition with Regrouping 2-67
Why do you regroup when you add?

Lesson H: Subtraction with Regrouping 2-77
How does regrouping help you subtract?

Lesson I: Inverse Operations 2-87
What is the relationship between addition and subtraction?

Lesson J: Applications of Addition and Subtraction 2-97
How are addition and subtraction used in the real world?

Off-Ramp Assessment 2-107

Book 3 – Multiplication and Division

On-Ramp Assessment	3-1
Lesson A: Multiplication	3-9
What does multiplication represent?	
Lesson B: Counting By 2s, 5s, and 10s	3-19
What is a multiple?	
Lesson C: Multiplication Facts	3-29
What strategies can you use to memorize multiplication facts?	
Lesson D: More Multiplication Facts	3-39
What strategies can you use to memorize the multiplication facts for 7, 8, and 9?	
Lesson E: Breaking Down Numbers	3-49
What strategies can you use to find factors of a number?	
Lesson F: Multiplication Algorithms	3-59
What algorithms can you use for multiplication?	
Lesson G: Division	3-69
What does division represent?	
Lesson H: Long Division	3-79
How does long division work?	
Lesson I: Inverse Operations	3-89
What is the relationship between multiplication and division?	
Lesson J: Applications of Multiplication and Division	3-99
How are multiplication and division used in the real world?	
Off-Ramp Assessment	3-109
